Geachte leden & belangstellenden,

In deze nieuwsbrief een voorschot op de NKAM activiteiten voor 2010.

Voorjaarssymposium

Het NKAM voorjaarssymposium heeft als thema "*Fundamentals of (rock) material characterization and deformation*".

Locatie & tijd: Kleine collegezaal, faculteit Geowetenschappen, Universiteit Utrecht, Budapestlaan 4 (Uithof).
Dinsdag 1 juni, 13:00-17:00 uur.

Voorlopig programma:

Sieger van der Laan (Corus Group)-
Novel analysis methods for phase composition and distributions.

Josepha Kempl (VU Amsterdam)-
Planetary core formation (provisional title)

Gerco Hoedeman (UU/TNO)-
Salt deformation and rheology (provisional title)

Sabine de Hartog (UU, winnaar De Roever Prijs 2009)-
Microphysics of subgrain development and dynamic recrystallization

Na afloop is er een borrel.

ALV & najaarssymposium

De algemene leden vergadering van 2010 zal gehouden worden voorafgaand aan het najaarssymposium. Datum & locatie volgen later.

Het voorlopige thema is "Planetology". Suggesties voor sprekers zijn welkom.

International Mineralogical Association (IMA)

De NKAM is de Nederlandse vertegenwoordiger van de IMA. Daarom willen we U attenderen op de IMA2010 meeting. Onderaan deze nieuwsbrief een aankondiging van de IMA Secretary General.

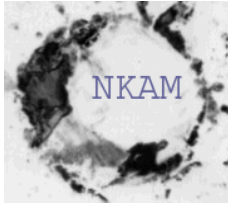

NKAM lidmaatschap

Er zijn weer enkele nieuwe aanmeldingen. Lid worden kan door 15 euro over te maken op rekening 2557527, t.n.v. Nederlandse Kring Aardse Materialen / NKAM te Den Haag.

Studenten en promovendi zijn vrijgesteld van contributie.

Met vriendelijke groet,

Jan ter Heege, secretaris NKAM

Announcement of IMA2010

We would like to inform you that the field trip registration of the 20th General Meeting of the International Mineralogical Association (IMA2010, Budapest, August 2010) has been opened.

Field work (including strong cultural and social components) has traditionally been an important part of the General Meetings of IMA.

IMA2010 offers 30 pre-, mid- and post-conference, 1-5 days-long field trips covering a very safe, clean and organised area of ten, mainly European Union countries in Central-SE Europe (http://www.ima2010.hu/?my_view=nice&p=ft0).

Regions such as Bohemia, Krakow, Slovakia, Styria, Tokaj Mountains, Transylvania or the Croatian Adriatic Sea, to include only a few, are well-known world wide for their mineralogical / petrological / geochemical sites of historical resonance back to the Roman or the Medieval Ages; old and recent ore and non-metallic deposits; and, last but not least, for their cultural attractions and for their picturesque landscapes (many UNESCO World Heritage sites). End of August weather is perfect for travel in the region.

For minimizing the risk of field trip cancellations and for encouraging the field trip participation we apply the flexible minimum participant number approach: For most trips the minimum participant number is as low as 5 persons, and the registration fees are still very moderate (between EUR 20 and EUR 260).

As a novelty, we introduced the Student/Young scientist IMA2010 field trip registration fee (between EUR 15 and EUR 160), which enables also this category of conference participants usually missing from the field trips of the large conferences, to take part in these programmes, as significant contribution to their professional development.

Deadlines:

Preliminary field trip registration: March 13 Final field trip registration: April 30.

IMA2010 field trips are open only to IMA2010 registered participants and their accompanying persons. Take the advantage of registering as soon as possible; field trips registration closes when the maximum number of participants (varying from case to case) is reached.

Please share this information with your colleagues who may also be interested.

With best regards, and looking forward to see you in Budapest,

Dana Pop
Secretary General of IMA2010
